The R&D group of NIIT boasts of an electric mix of people from varying backgrounds. It is headed by Sugata Mitra who has a PhD in physics from IIT-Delhi. He has over 20 years of experience in computational physics, living systems, publishing, education, neural networks, multimedia, instructional design, cognitive and adaptive systems. Sugata is a member of New York Academy of Science, a UNDP consultant to Indira Gandhi National Centre for the Arts, a member of IEEE and the Planetary Society, USA. He also a member of Special Interest Group on Virtual Reality. Apart from this the R&D group interests range from Computer Science, Education, Electrical Engineering, Mathematics, Physics to Psychology. A bulk of the people however are computer programmers and engineers.

Research and Development is central to NIIT's IT learning philosophy. It is a core strength that helps us identify the emerging market needs, leads us to create new learning methodologies and techniques, helps us refine our curriculum, making it cutting-edge, and enables us to improve our education delivery. Our pioneering efforts in the understanding of human cognition has added to the learning effectiveness of our offerings. NIIT scientists are creating solutions capable of dealing with the new learning environment thrown open by the Internet, that addresses anytime, anywhere learning.

Besides making our IT learning more state-of-the-art, through innovations in Cognitive Multimedia, Constructivist Education and the Human-Computer Interface, our R&D initiatives have also led to several breakthroughs in areas such as NetCentric Computing and e-Commerce. NIIT's R&D is poised to shape the usage of IT, creating solutions for tomorrow's world.

NIIT offers a range of simple-to-comprehend, easy-to-learn programs which bring IT awareness into the lives of ordinary people. Aimed at housewives, school students and senior citizens, NIIT's IT awareness programs equip them with basic, hands-on IT skills that can be effectively used in the home and office environments. NIIT's IT-awareness programs have something for everyone.

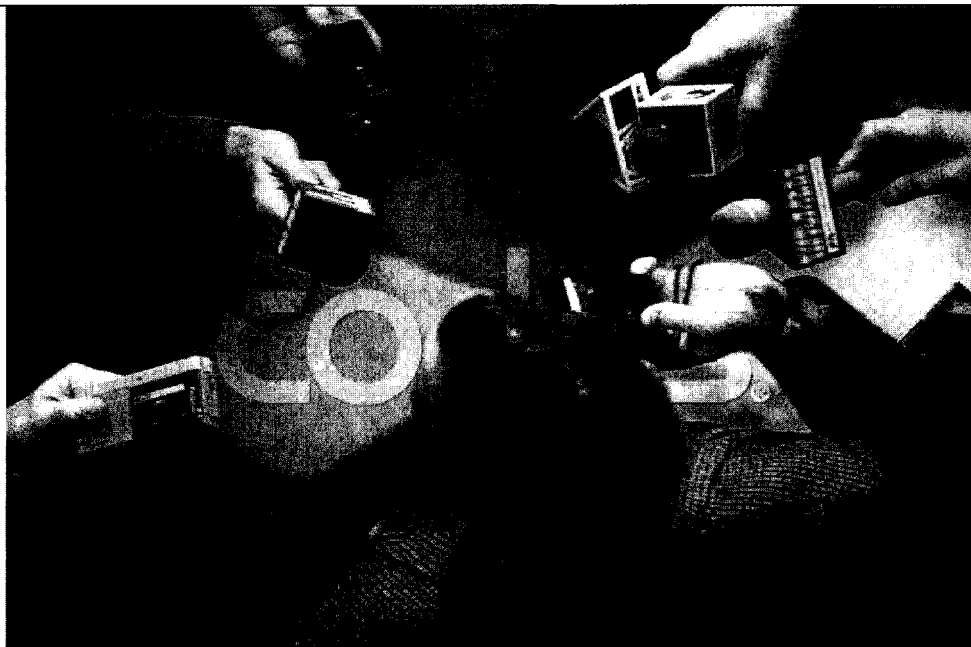

NIIT's IT Awareness range of offerings includes:

- SWIFT** - A complete umbrella of modules specially customized to create basic IT skills among school and college students, professionals (including medical practitioners), women and ordinary citizens.
- Program for ICAI Members** - NIIT has tied up with the Institute of Chartered Accountants of India (ICAI) to provide

NIIT offers eNCORE to manage student administration in institutes. The eNCORE student management system is an integrated application that provides data synchronization across centers and manages administrative data related to students. The functionality of eNCORE includes managing transcription, enabling communication among centers, ensuring student registration, and carrying out student transfers. The application also automates the tasks performed by the front office and accounts department. eNCORE has been helping global Education businesses to manage the complete education operation at more than 2000 centers for the last 5 years.

Key benefits provided by eNCORE are:

- Providing one system to users at all levels (Centers, Regional office and Head office).
- Ease of Operations for Center Staff, Student, Business Partner, and Region/HO.
- Greater flexibility and generalization within the system ? Security at field and file level.
- Creation and maintenance of important files by authorized role holders only.
- Possibility of interfaces with existing systems and other automated systems
- Ease in data consolidation at HO/RO through automated
